

Streamlining contract management for seamless growth: how PSW transformed operations with SaaSAM's custom CLM solution.

OBJECTIVE

PSW required a centralised, efficient contract management system to support operational growth, simplify contract approvals, control access, and improve tracking. A unified repository, structured workflows, and automated notifications were critical to keep internal and external processes organised.

SOLUTION

SaaSAM Group implemented a custom CLM system for PSW featuring a secure, centralized repository, approval workflows with role-based access, e-signature support, audit trails, and automated notifications for deadline management. Integration with PSW's legacy Dynamics system and resolution of FTP integration challenges enabled smooth data handling and minimized manual intervention.

BENEFITS

PSW's contract management is now simplified, automated, and transparent. The solution reduced manual processes, improved compliance, and ensured easy access to contract information, allowing PSW to focus on expansion with minimal administrative burden.

AT A GLANCE

CHALLENGES

- Ensuring smooth FTP integration for consistent data flow
- FTP integration challenges
- Developing scalable workflows that meet PSW's growth and efficiency needs

BENEFITS

- Centralised, accessible contracts
- Automated workflows and notifications
- Enhanced compliance with audit trails and secure access

PSW MANAGER

"SaaSAM's expertise transformed our contract management. Their tailored solution simplified processes, enhanced transparency, and gave us the tools we need to support PSW's growth."
