Sourcing and Supplier Information Management

Extend the value of your Agiloft Contract Lifecycle Management platform with Agiloft's Sourcing and Supplier Information Management add-on module.

Sourcing and procurement leaders are searching for ways to deliver more business impact and optimise cost while balancing consolidation, increasing customer demands, and the need for agility.

Agiloft's Sourcing and Supplier Information Management module works seamlessly with the Contract Lifecycle Management solution to reduce sourcing cycle time, automate supplier onboarding and ongoing compliance, and track supplier performance.

Automate your Source-to-Contracting process

Improve Decision Making

Speed RFx-to-Contract

Adapt as Needs Evolve

Turn Opportunities into Savings

Automate Supplier Information Management

"96% of Sourcing and Procurement leaders say staff will have to significantly improve their effectiveness at using digital technology to improve in their role"

- Gartner®

SSIM Features and Benefits

The module includes a wide array of features and functionality, including the following:

Centralised RFx-to-Contract Cycle	- Invite suppliers to submit proposals, then quickly collect and collaborate submissions. - Allow stakeholders to appraise, score, and compare suppliers for their projects — all online. - Convert awards into contracts with the click of a button, using approved terms and conditions.
Automate Supplier Information Management	- Allow prospective suppliers to register, and provide data and documents, through a supplier portal. - Gather responses to custom questionnaires on security, diversity, and other business criteria. - Compile data to verify compliance with business criteria and policies. - Prequalify, approve, and automate supplier contract notifications and requests for documentation.
Centralised Repository of Templates and Supplier Documents	Centralise and streamline the source-to-contract process. Create standardised templates with pre-approved language for RFIs, RFPs, and RFQs and supplier questionnaires. Maintain a robust repository of all documents as released and supplier responses.
Improved Visibility	Tap into Agiloft's unified source-to-contract CLM platform to quickly identify existing suppliers. Gain visibility into supplier relationships and contracts across your company, including viewing terms, scope, pricing, and volume discounts.

Use Case Example
Before: A supplier was onboarded manually with no connection to contractual terms, leading to duplicated data entry and delayed risk reviews.
After: With the SIM module, onboarding is automated, risk assessments are embedded, and contract records are initiated instantly from approved supplier profiles.
